

# **GSLs Workshop “Job Profiles and Career Options in the Pharmaceutical Industry”**

**with Dr Petra Arndt**

**11<sup>th</sup> December 2018, 12:30 – 17:30**

Seminar Room 01.001/002, Beatrice-Edgell-Weg 21, 97074 Würzburg

## **The workshop**

There are many different job options and professional roles in a typical pharmaceutical company. What are the opportunities for applicants in Life Science? The challenge is to find out who hires and what the entry-level job is called.

This workshop will explain, discuss, and train different job profiles along the pharmaceutical value chain. Participants will work with 'real' job descriptions published by Pharma (on their homepage or job search portals) to find out which working field could fit individually. Participants' CVs will be discussed individually with the trainer prior to, during and after the seminar.

## **The trainer**

Dr Petra Arndt is a coach and trainer focusing on career paths in natural science. She did her PhD in Biology at Würzburg University and worked in both academia and the pharmaceutical industries as research scientist and project manager. She currently works as clinical project manager at Heidelberg University Hospital.
